

## **SUPPLEMENTAL AIRPLANE MAINTENANCE MANUAL**

### **New Low-Pressure Fuel Pump**

This Supplemental AMM is approved in conjunction with the DEO valid in conjunction with the basic Airplane Maintenance Manual (AMM).

The limitations and information contained herein either supplement or, in the case of conflict, override those in the AMM.

**Doc. No. : 6.02.15 - DEO 40-010**

**Date of Issue : 16-Feb-2023**

**Design Change Advisory : DEO 40-010**

This document must be carried in the Airplane Maintenance Manual (AMM) at all times. It describes the maintenance procedures.

The technical content of this document has been approved under the authority of the DOA ref. EASA.21J.052.

Intentionally left blank.

**CHAPTER 03 – GENERAL DESCRIPTION**

**2. Description**

A new electrical fuel pump is replacing the former model for obsolescence reasons. The new fuel pump requires different brackets for installation.

**Maintenance Practices**

**6. Remove/Install the Electrically Driven Fuel Pumps with Bypass Valve**

**B. Install the Electrically Driven Fuel Pumps with Bypass Valve**

	<b>Detail Steps/Work Items</b>	<b>Key Items/References</b>
(1)	Install the fittings and copper washers provided with the fuel pumps	Pump fitting torque: 17 - 25 Nm (12.5 – 18.5 lbf.ft.).
(2)	Install the fuel pump assembly and tighten the four worm drive clamps.	
(3)	Install and tighten the two nuts which attach the fuel pump banjo to the support bracket.	
(4)	Install the bypass unit: - Fuel line, bypass valve and T-fitting.	
(5)	Connect the electrical wires of the fuel pumps to the airplane electrical system.	
(6)	Install the access panel under the fuselage around the gascolator drain valve.	Refer to Section 52-40.
(7)	Conduct an engine ground run.	Refer to Section 71-00.
(8)	Inspect the airplane for fuel leakage.
