

# MANDATORY SERVICE BULLETIN

#### MSB 50-003/6

#### SUPERSEDES MSB 50-003/5

#### I TECHNICAL DETAILS

#### I.1 Category

Mandatory.

#### I.2 Airplanes affected

Type: DA 50 C

Serial Numbers: 50.002, 50.003, 50.006

50.C.A.A.007 and subsequent, 50.C.Q.A.001 and subsequent

#### I.3 <u>Time of Compliance</u>

At next scheduled maintenance action.

Note: Prior compliance with MSB 50-003 through MSB 50-003/4 does not constitute

compliance with this MSB.

#### I.4 Subject

Software for Garmin G1000 NXi; approved software systems, manifests and configurations.

#### I.5 Reason

Summary of approved software systems, manifests and configurations for Garmin G1000 NXi.

#### I.6 Concurrent Documents

Garmin G1000 NXi Line Maintenance Manual, 190-02631-00, latest effective issue.

DAI MSB 50-003/6 Page 2 of 8 05-Sep-2024

#### I.7 Approval

The technical information or instructions contained in this document relate to the Design Change Advisory No. VÄM 50-002, OÄM 50-001, OÄM 50-003, OÄM 50-004, OÄM 50-006 through OÄM 50-010, OÄM 50-011, OÄM 50-013, OÄM 50-018, OÄM 50-027/a, OÄM 50-031, OÄM 50-032, OÄM 50-050, MÄM 50-115, MÄM 50-140 and MÄM 50-221 which have been approved under the authority of EASA Design Organization Approval ref. EASA.21J.052 or by EASA.

The technical content of this document has been approved under the authority of DOA ref. EASA.21J.052.

#### I.8 Accomplishment/Instructions

Compare installed software system and related manifests with approved ones stated in this service bulletin.

If installed software system and related manifests are not approved, perform an update to the latest approved software version according to the instructions given in the G1000 NXi Line Maintenance Manual, latest effective issue or other related Garmin documents.

An update to a later approved software system with the related manifest may be carried out on every aircraft. Perform the update according to the instructions given in the G1000 NXi Line Maintenance Manual, latest effective issue or other related Garmin documents.

**NOTE:** Changing the software system requires new configuration of the system. Refer to the Garmin documentation for software configuration.

**NOTE:** Determine what optional equipment (i.e. ADF, DME, WX500, etc.) is installed in the airplane before loading software.

Determine what optional features (i.e. Synthetic Vision (SVT), Jeppesen ChartView, etc.) are installed before loading the AIRFRAME configuration file. If the AIRFRAME configuration file is loaded from the system software card, you will need to unlock the optional features using their unlock cards. Make sure that all of the required materials and equipment are on hand before you begin the upgrade procedure.

Approved Configurations (Software)	Remarks	
NOTE: Even though more options may be included in the software loader card, only those shown below are currently approved for installation.		
DA50 Option – ADF	Install if an ADF is installed in the airplane (OÄM 50-003)	
DA50 Option – Deicing	Install if the de-icing system is installed in the airplane (OÄM 50-011)	
DA50 Option – DME	Install if a DME is installed in the airplane (OÄM 50-004)	
DA50 Option – Fuel Tanks: Fuel calibration*1)	Refer to Note 1 below.	
DA50 Option – Fuel Tanks: Pre-calibrated*1)	Refer to Note 1 below.	
DA50 Option – GCU 476	Install if a Garmin Control Unit GCU 476 is installed in the airplane (OÄM 50-018).	

Approved Configurations (Software)	Remarks
DA50 Option – GDL69A SXM	Install if a Garmin Datalink Receiver GDL69A SXM is installed in the airplane (OÄM 50-027/a).
DA50 Option – Flightstream 510 Enable	Install if a FS 510 is installed in the airplane (OÄM 50-032).
DA50 Option – GFC700 with ESP and USP	Install if GFC 700 Autopilot System is installed in the airplane; NOTE: an additional unlock card is required.
DA50 Option – GSR56	Install if a Satellite Transceiver GSR56 is installed in the airplane (OÄM 50-010)
DA50 Option – GSR56 Voice/Text Only	Optional to "DA50 Option – GSR56" above: Install if a Satellite Transceiver GSR56 is installed in the airplane (OÄM 50-010).
DA50 Option – GTS 800	Install if a Garmin Traffic Advisory System GTS800 (OÄM 50-050) is installed in the airplane.
DA50 Option – GTX 345 Option	Install if a GTX 345 transponder is installed in the airplane.
DA50 Option – GTS 345 and GTS 800	Install if a GTX 345 transponder and Garmin Traffic Advisory System GTS 800 (OÄM 50-050) is installed in the airplane.
DA50 Option – GTX 345 and TAS600	Install if a GTX 345 transponder and Avidyne Traffic Advisory System TAS6xx (OÄM 50-006) is installed in the airplane.
DA50 Option – Aerox Oxygen Pressure <sup>2*)</sup>	Install if an Oxygen System with aerox pressure sensor is installed in the airplane (OÄM 50-001).
DA50 Option – ADZ Nagano Oxygen Pressure <sup>2*)</sup>	Install if an Oxygen System with ADZ Nagano pressure sensor is installed in the airplane (OÄM 50-001).
DA50 Option – Propeller Deicing	Install if the propeller de-icing system is installed in the airplane (OÄM 50-011)
DA50 Option – TAS600 Series Installation	Install if a Traffic Advisory System is installed in the airplane (OÄM 50-006).
DA50 Option – WX500	Install if a Stormscope WX500 is installed in the airplane (OÄM 50-013).

- 1\*) This two options are not required to be installed. If either one is installed, the steps below have to be followed.
  - "Fuel Tanks: Fuel calibration" requires manual calibration of the fuel quantity indicators. For calibration, refer to Work Instruction WI-MSB 50-003, latest effective issue.
  - "Fuel Tanks: Pre-calibrated" uses pre-defined frequency values of the fuel probes for the fuel quantity indication.
- 2\*) Refer to Airplane Flight Manual Doc. No. 9.01.01-E section 06-10 Equipment List to determine the installed pressure transducer.

#### III REMARKS

- 1. All work must be done by a certified aircraft service station or a certified aircraft maintenance mechanic.
- 2. Completion of all work must be recorded in the log book.
- 3. In case of any doubt contact Diamond Aircraft Industries GmbH.
- 4. The content of this MSB is mandatory in accordance with EASA TCDS EASA.A.639.

# WORK INSTRUCTION WI-MSB 50-003

# Installation of G1000 NXi System Software 010-02576-02

## I GENERAL INFORMATION

#### I.1 Subject

This work instruction announces the installation of G1000 System Software Version P/N 010-02576-02.

#### I.2 Reference Documents

Diamond Aircraft DA 50 C Airplane Maintenance Manual, Doc. No. 9.02.01, latest effective issue.

Garmin G1000 NXi Line Maintenance Manual, P/N 190-02631-00, latest effective issue.

#### I.3 Remarks

- a) All work must be done by a certified aircraft service station or a certified aircraft maintenance mechanic.
- b) All work, in particular if not described in this work instruction, must be done in accordance with the referenced maintenance manual.
- c) For conversion factors between SI units and US/Imperial units refer to AMM Chapter 02.
- d) In case of doubt, contact Diamond Aircraft Industries GmbH.

#### II.3 Material

Quantity	Part Number	Description
1	010-02576-02	G1000 NXi Software Loader Card (Diamond DA50)
1 <sup>*)</sup>	006-B0371-03	GIA64 Boot Block v2.02.1

<sup>\*)</sup> Optional software. The boot block software may be required after a GIA replacement. No DA 50 is delivered without this version installed.

Material is available from Diamond Aircraft Industries or Garmin. The GIA64 Boot Block loader is available from the Garmin Dealer Resource Center only.

# **III INSTRUCTIONS**

1	These instructions present field upgrade procedures for the G1000 NXi System Software 010-02576-02 for the DA 50 C.
	These instructions must be followed step-by-step in order and completely, to upgrade an existing approved configuration of the system software to a newer approved configuration.
	It is assumed that the person performing the upgrade is familiar with the aircraft and has a good working knowledge of the Garmin G1000 NXi System.
	NOTE
	All G1000 NXi screen shots used in this document are intended to
	provide visual reference only. All information depicted in screen
	shots, including software file names, versions and part numbers, is subject to change and may not be up to date.
2	In the aircraft, turn the aircraft ELECT. MASTER switch on.

Look at the MFD power-up screen (see following figure). In the upper right corner, the display shows 'Diamond DA50, System XXXX.XX'.

This 'System' number is the System Software Version. It correlates to the G1000 NXi, DA50 System Loader Card. For example:

#### **EXAMPLE:**

System Software Version '2576.02' = Loader Image P/N 010-2576-02

- If the System Software Version is already at 2576.02, this Software Service Bulletin may have already been performed, proceed to the Testing Procedure at the end of this bulletin.
- 6 Turn the aircraft ELECT. MASTER switch off.

#### NOTE

Performing the software update described in this bulletin will delete all stored Pilot Profiles, user waypoints, stored flight plans, and map settings from memory.

#### **Software Load Preparation**

Determine which optional equipment (i.e. ADF, DME, WX500, etc.) is installed in the airplane before loading software.

Determine what optional features (i.e. Synthetic Vision (SVT), Jeppesen ChartView, etc.) are installed before loading the AIRFRAME configuration file. If the AIRFRAME configuration file is loaded from the system software card, you will need to unlock the optional features using their unlock cards.

Make sure that all of the required materials and equipment are on hand before you begin the upgrade procedure.

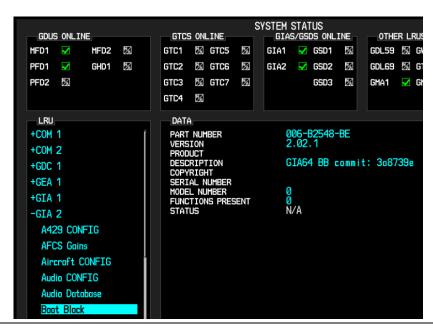

WI-MSB 50-003 Revision 2 Page 4 of 17 29-Jun-2022

	<ul> <li>Software Loader Card</li> <li>GIA 64 Boot Block Loader (optional, see Section II.3)</li> <li>Chart View Unlock Card (optional OÄM 50-007)</li> <li>SVS Unlock Card (optional, OÄM 50-008)</li> <li>Enhanced AFCS Unlock Card (OÄM 50-009)</li> </ul>
8	While performing this procedure ensure the airplane is connected to and drawing power from a power cart. A loss of power during this procedure may result in a defective GIA.
9	Disengage (pull) the MFD and PFD circuit breakers.
10	Turn on the ELECT. MASTER switch.
11	Turn on the AV MASTER switch.
12	Turn on the ground power unit.
13	While holding the ENT key on the MFD, engage the MFD circuit breaker.
14	When the words appear INITIALIZING SYSTEM in the upper left corner of the MFD, release the ENT key.
15	Repeat steps 13 and 14 for the PFD.
16	While in configuration mode write down the following configuration settings:
	Aircraft Configuration  Aircraft Registration: ICAO Address: ICAO Region: Domain Identifier: VFR Code:
	Transponder Airframe Configuration  1090 ES Out Control:
	Marker Beacon Hi Sensitivity Offset (dB):

Navigate to the system status page and verify which Boot Block software version is installed on GIA #1 and GIA #2. If the boot block is already Part Number 006-B2546-BE, Version 2.02.1 skip the "GIA 64 Boot Block Load" section below.

#### GIA 64 Boot Block Load (optional, refer to Section II.3)

- 18 Disengage (pull) the MFD and PFD circuit breakers.
- 19 Insert the GIA 64 Boot Block Loader Card into the PFD top card slot.
- While holding the ENT and CLR keys on the PFD and MFD, engage the PFD and MFD circuit breakers.
- When the words appear **INITIALIZING SYSTEM** in the upper left corner of the PFD/MFD, release the ENT and CLR keys.
- 22 Using the PFD, go to the SYSTEM UPLOAD page using the FMS knob.
- 23 Activate the cursor and highlight the ITEM field.

- 24 Press the LOAD softkey to begin the software loading process.
- 25 Press the UPDT CFG softkey.

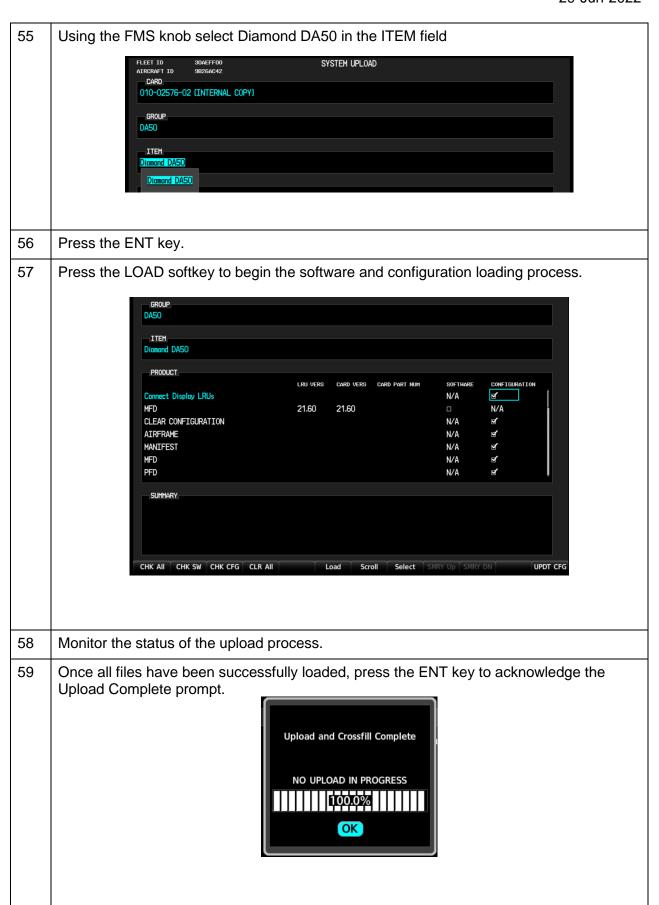

WI-MSB 50-003 Revision 2 Page 6 of 17 29-Jun-2022

26	Wait until the configuration module is updated and then press the ENT key to acknowledge.
27	Disengage (pull) the MFD and PFD circuit breakers.
28	Remove the GIA 64 Boot Block Loader Card from the PFD top card slot.
29	Continue from step 31 below.
MF	o and PFD Software Load:
30	Disengage (pull) the MFD and PFD circuit breakers.
31	Insert the G1000 NXi Software Loader Card into the MFD top card slot.
32	While holding the ENT key on the MFD, engage the MFD circuit breaker.
33	When the words appear INITIALIZING SYSTEM in the upper left corner of the MFD, release the ENT key.
34	Press the ENT key to acknowledge the following prompt (NOTE: A softkey labeled 'YES' appears in the lower right corner and may be used instead of the ENT key):
	DO YOU WANT TO UPDATE SYSTEM FILES? NO WILL BE ASSUMED IN 30 SECONDS.
35	The following screen is displayed.
	DO YOU WANT TO UPDATE SYSTEM FILES? NO WILL BE ASSUMED IN 20 SECONDS. UPDATING SYSTEM FILES, PLEASE WAIT.
36	When the "DO YOU WANT TO UPDATE SPLASHSCREEN" prompt appears, press the YES softkey.
37	Press any key to confirm update completion after the splash screen has finished loading.
38	If a message appears about verifying the databases, press any key to continue.
39	New software is loaded to the MFD. When complete, the MFD starts in configuration mode.
40	Pull the MFD circuit breaker.
41	Remove the G1000 NXi Loader Card from the MFD and insert it into the top card slot on the PFD.
42	While holding the ENT key on the PFD, engage the PFD circuit breaker.
43	When the words appear INITIALIZING SYSTEM in the upper left corner of the PFD, release the ENT key.

WI-MSB 50-003 Revision 2 Page 7 of 17 29-Jun-2022

Initial G1000 NXi Software and Configuration Upload:	
51 Using the PFD, go to the SYSTEM UPLOAD page using the FMS knob.	
52 Activate the cursor and highlight the GROUP field.	
53 Using the FMS knob select DA50.	
54 Press the ENT key.	

WI-MSB 50-003 Revision 2 Page 9 of 17 29-Jun-2022

#### **Optional Equipment:**

- If the airplane is equipped with any of the following optional equipment, perform the procedure below to load software and configuration files. If the DA 50 C is not equipped with any of the following options (except "Fuel Tanks"), proceed to Step 70 of this bulletin. Even though more options may be included in the software loader card, only those shown in the MSB 50-003, latest effective issue are currently approved for installation.
  - DA50 Option ADF
  - DA50 Option DME
  - DA50 Option Fuel Tanks: Fuel calibration<sup>1\*)</sup>
  - DA50 Option Fuel Tanks: Pre-calibrated<sup>1\*)</sup>
  - DA50 Option GCU 476
  - DA50 Option Flightstream 510 Enable
  - DA50 Option GFC 700 with ESP and USP
  - DA50 Option GSR 56
  - DA50 Option GSR 56 Voice/Text Only
  - DA50 Option GTX 345 Option
  - DA50 Option GTX 345 and TAS 600
  - DA50 Option Aerox Oxygen Pressure<sup>2\*)</sup>
  - DA50 Option ADZ Nagano Pressure<sup>2\*)</sup>
  - DA50 Option TAS600 Series Installation
  - DA50 Option WX500
  - 1\*) This two options are not required to be installed. If either one is installed, the steps below have to be followed.
    - "Fuel Tanks: Fuel calibration" requires manual calibration of the fuel quantity indicators. Recommended option. For calibration, refer to Step 74 of this bulletin.
    - "Fuel Tanks: Pre-calibrated" uses pre-defined frequency values of the fuel probes for the fuel quantity indication. A check of the fuel quantity indicators is required if this option is loaded.
  - 2\*) Refer to Airplane Flight Manual Doc. No. 9.01.01-E section 06-10 Equipment List to determine the installed pressure transducer.

# Loading Optional Equipment Software and Configuration Files: 61 If not already there, go to the SYSTEM UPLOAD page using the FMS knob. 62 Activate the cursor and highlight the GROUP field. 63 Using the FMS knob select DA 50 C Options. 64 Press the ENT key.

65 Using the FMS knob select the appropriate option and press the ENT key. SYSTEM UPLOAD 010-02576-02 [INTERNAL COPY] DA50 Options DASO Option – Decing DASO Option – DME DASO Option – Flightstreom 510 Enable DASO Option – Fuel Tanks: Fuel Calibratic DASO Option – Fuel Tanks: Pre-calibrated DASO Option – GCU 476 DASO Option – GCL69A SXM Cancel Scroll Select 66 Press the LOAD softkey, to begin the software and configuration loading process. Press the ENT key to acknowledge the Upload Complete prompt. 67 Upload and Crossfill Complete NO UPLOAD IN PROGRESS OK 68 View the SUMMARY field and ensure that all items are "COMPLETED". 69 Repeat steps 65 through 68 to load any other equipped options.

Re-enter the configuration settings of the Audio Panel into the Set column as noted in Step 16 of this bulletin and press the "Set>GMA 1" softkey.

Enter the Aircraft Registration, ICAO Address and VFR Code on the Aircraft Configuration Page. Press the "Set GTX1" softkey after the data entry.

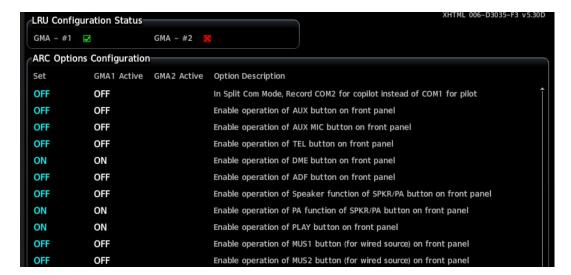

Re-enter the configuration settings of the Transponder as noted in Step 16 of this bulletin.

73 Verify following settings on the GMA Options page.

TEL button should be set to ON if a GSR56 Satellite Transceiver is installed. DME button should be set to ON if a DME is installed.

ADF button should be set to ON is an ADF is installed.

- 74 If the option "Fuel Tanks: Fuel Calibration" has been loaded, perform steps 75 to 82. Otherwise proceed with step 83.
- The Level the airplane in accordance with the Airplane Maintenance Manual.
- 76 Completely drain both fuel tanks.
- Re-fill 1.0 USgal into the left fuel tank and 1.5 USgal into the right fuel tank.

Navigate to the Fuel Tank Calibration page. Press the following softkeys in sequence 12, 11, 10, 9

79 Select the left fuel tank, manually set ACTUAL FUEL QUANTITY to 0.00GL and select CALIBRATE? using the ENT key. Verify data entry and confirm the "Overwrite data" message by selecting YES and pressing the ENT key.

80 Repeat for the RIGHT tank.

81 Re-fill another 1.0 USgal into the left fuel tank and another 1.5 USgal into the right fuel tank and calibrate the data points. ACTUAL FUEL QUANTITY CALIBRA 1.00<sub>GL</sub> CALIBRATE? ACTUAL FUEL QUANTITY CALIBRA 1.50gl CALIBRATE? 82 Re-fill another 4.0 USgal into the left fuel tank and another 3.5 USgal into the right fuel tank and calibrate the 5.00USgal data points. Repeat for all datapoints shown in the calibration table. (max. 25.00 LH and 24.00 RH) CALIBRATION TABLE ACTUAL QUANTITY CALIBRATED VALUE 0.00GL 0.00000 1.00GL 3.78541 5.00gL 18.92706 10.00GL 37.85413 15.00<sub>GL</sub> 56.78119 20.00GL 75.70825 25.00GL 94.63531 Go to the CONFIGURATION MANAGER page and pres the CNFM CFG softkey. 83 CONFIGURATION MANAGER CONFIGURATION IDENTIFICATION EXPECTED

Wait until the configuration module is updated and then press the ENT key to acknowledge.

#### **Software Load Confirmation:**

87

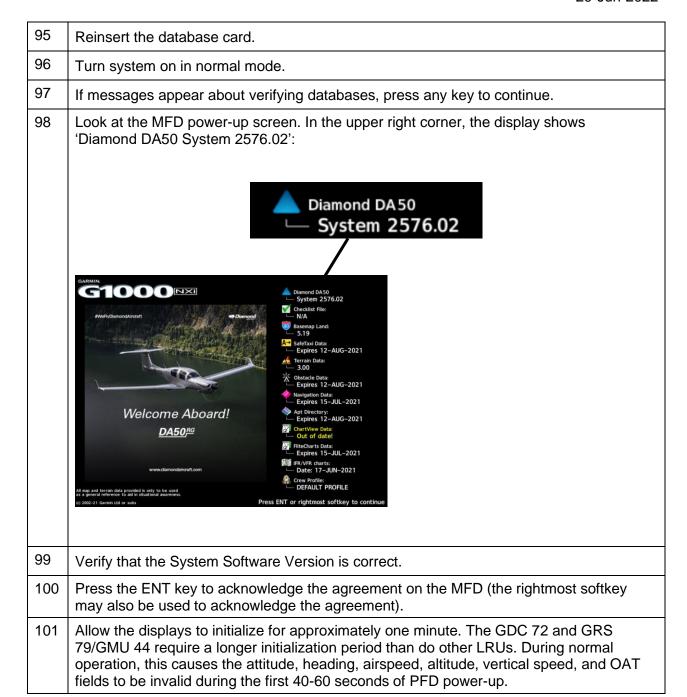

- Using the PFD, go to the System Status page using the FMS knob. Activate the cursor and toggle to the LRU window.
- In the LRU window, highlight each of the items listed in the following table and verify that the software part number and version displayed on the System Status page matches those listed in the table in MSB 50-003 latest effective issue.
- 90 De-activate the cursor.
- 91 Turn off system power.
- Remove the G1000 NXi System Software Loader Card from the PFD and set it aside.

#### **Software Operational Test:**

#### CAUTION

Do not insert the obstacle/terrain data SD cards into the bottom slot of both the PFD and MFD until all software and configuration files have been loaded and all displays have been powered up in normal mode at least one time subsequent to loading software. Failure to do so may result in obstacles not displaying correctly.

- 93 Turn system on in normal mode and wait until it is completely powered up.
- 94 Turn off system power.

102 Verify that no 'Manifest' errors appear when the ALERTS softkey is pressed.

NOTE: A 'FAILED PATH' message is normal, as long as the Engine Master Switch is switched off.

- If the option "Fuel Tanks: Pre-Calibrated" has been loaded into the system, verify correct indication of the fuel quantity indicators.
- Perform additional testing of the G1000 NXi in accordance with the Garmin G1000 NXi Line Maintenance Manual, P/N 190-02631-00.

NOTE: After installation of new software into the G1000 NXi, the optional Synthetic Vision (SVT), Chart View, etc. must be re-activated.

105 Make all necessary entries in the airplane logs.
