

SERVICE INFORMATION NO. SI 50-003

NOTE: SI's are used only:

1) To distribute information from DAI to our customers.

2) To distribute applicable information/documents from our suppliers to our customers with additional information.

Typically there is no revision service for SI's. Each new information or change of that will be sent along with a new SI.

I. TECHNICAL DETAILS

1.1 Airplanes affected:

All DA 50 C airplanes

1.2 Subject:

Continental Aerospace Technologies GmbH Service Bulletin No. SB CG 300-1001 P1

ATA-Code: 72-00

1.3 Reason:

Continental Aerospace Technologies GmbH has issued Priority 1 Safety Service Bulletin No. SB CG 300-1001 P1 mandating an oil analysis of Centurion 3.0 (CD-300) engines. The measures are limited to an engine serial numbers listed in the SB CG 300-1001 P1.

1.4 Information:

For detailed technical information refer to Continental Aerospace Technologies GmbH Service Bulletin No. SB CG 300-1001 P1 which is applicable without any further additions or restrictions.

II. OTHERS

Continental Aerospace Technologies GmbH Service Bulletin No. SB CG 300-1001 P1 is attached to this Service Information.

In case of doubt contact Continental Aerospace Technologies GmbH.

SB CG 300-1001 P1

Time of Compliance:

Measures have to be accomplished according to actual runtime of the engine and the amount of conducted engine oil analysis.

- a) Engine runtime is below 100 h and no engine oil exchange was carried out (no engine oil sample is available):
 Compliance time is 3h, flights are limited to VFR conditions.
- Engine runtime is below 100 h and an engine oil exchange was carried out (an engine oil sample is available).
 Compliance time is 50 h or next scheduled maintenance, whatever occurs first.
- c) Engine runtime is above 100 h and an engine oil exchange was carried out (engine oil samples are available).
 Compliance time is 100h or next scheduled maintenance, whatever occurs first.
 If engine oil samples are not available → proceed to a)

Reason:

An incident of a power loss was reported. The investigation revealed that the loss of power was caused by a failed main bearing what resulted in an engine failure. The root cause was not fully determined. Continental Aerospace Technologies GmbH has decided to monitor the engine oil closely to identify any abnormalities at an early stage.

Correction:

Carry out an engine oil analysis in accordance with OM-06-01, Chapter 6 (Annex 18), submit the results and send the oil filter to Continental Aerospace Technologies GmbH for further analysis.

Additional analysis of all previous conducted Engine oil samples as required by OM-06-01, Chapter 6 (Annex 5) and carry out an Engine oil analysis in accordance with OM-06-01, Chapter 6 (Annex 18), submit the results to Continental Aerospace Technologies GmbH.

Introduction of additional maintenance tasks:

Additional 3-6h (since new) maintenance action:

Carry out an engine oil analysis in accordance with OM-06-01, Chapter 6 (Annex 18), submit the results and send the oil filter to Continental Aerospace Technologies GmbH for further analysis.

Additional 50h (since new) maintenance action:

Carry out an engine oil analysis in accordance with OM-06-01, Chapter 6 (Annex 18), submit the results and send the oil filter to Continental Aerospace Technologies GmbH for further analysis.

Additional maintenance action every 100h:

Carry out an engine oil analysis in accordance with OM-06-01, Chapter 6 (Annex 18), submit the results to Continental Aerospace Technologies GmbH.
