

Updating CD Catalog (Offline Computers)

Requirements:

CD Catalog has to be installed at the computer (not started from CD).

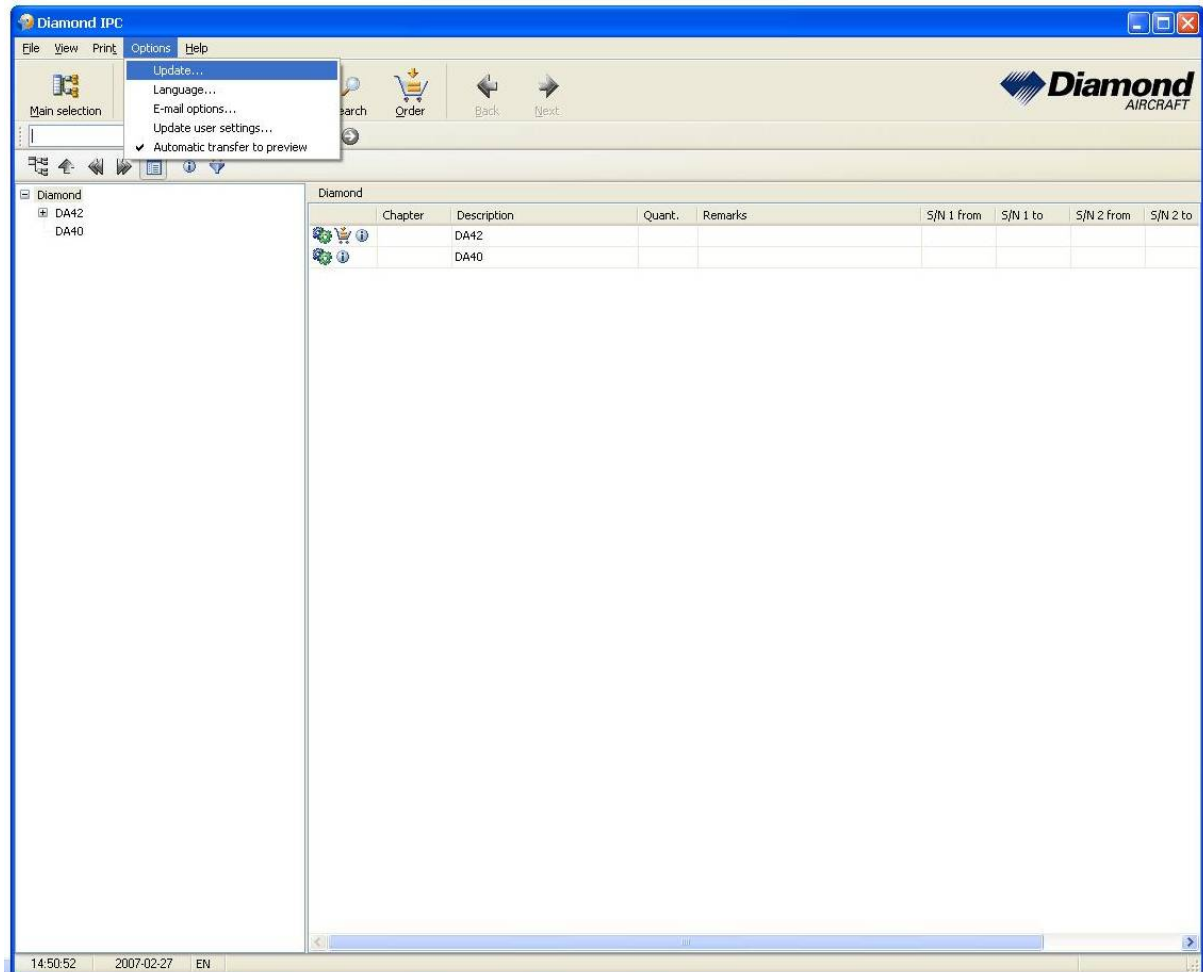

Step 1:

Select the URL <http://ipc.diamond-air.at/ipp/webupdate/> at a computer with connection to the internet.

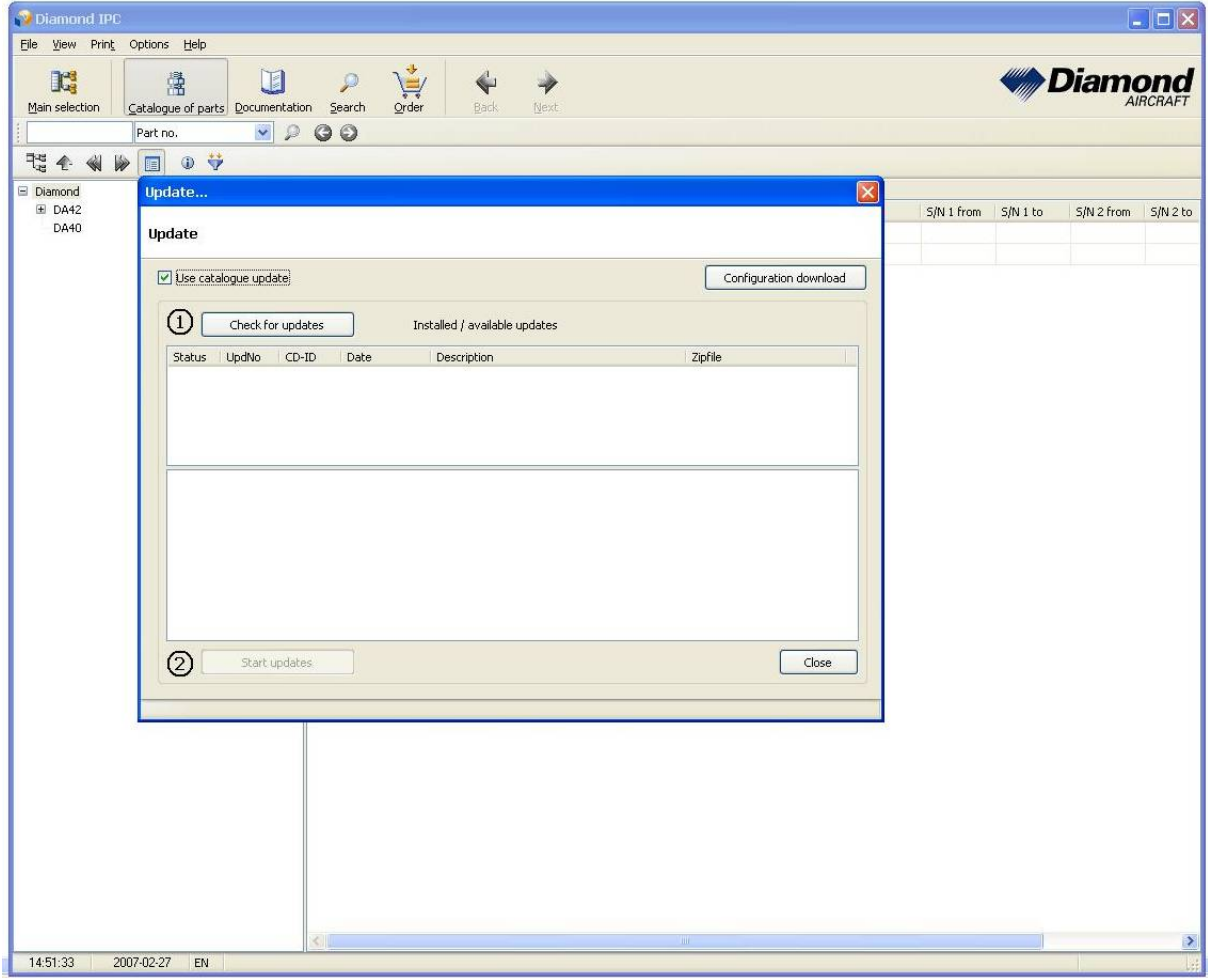

Download the available files and copy them to path [D:\Update](#) of the computer to be updated.

Step 2:

Start CD Catalog and select "Update...".

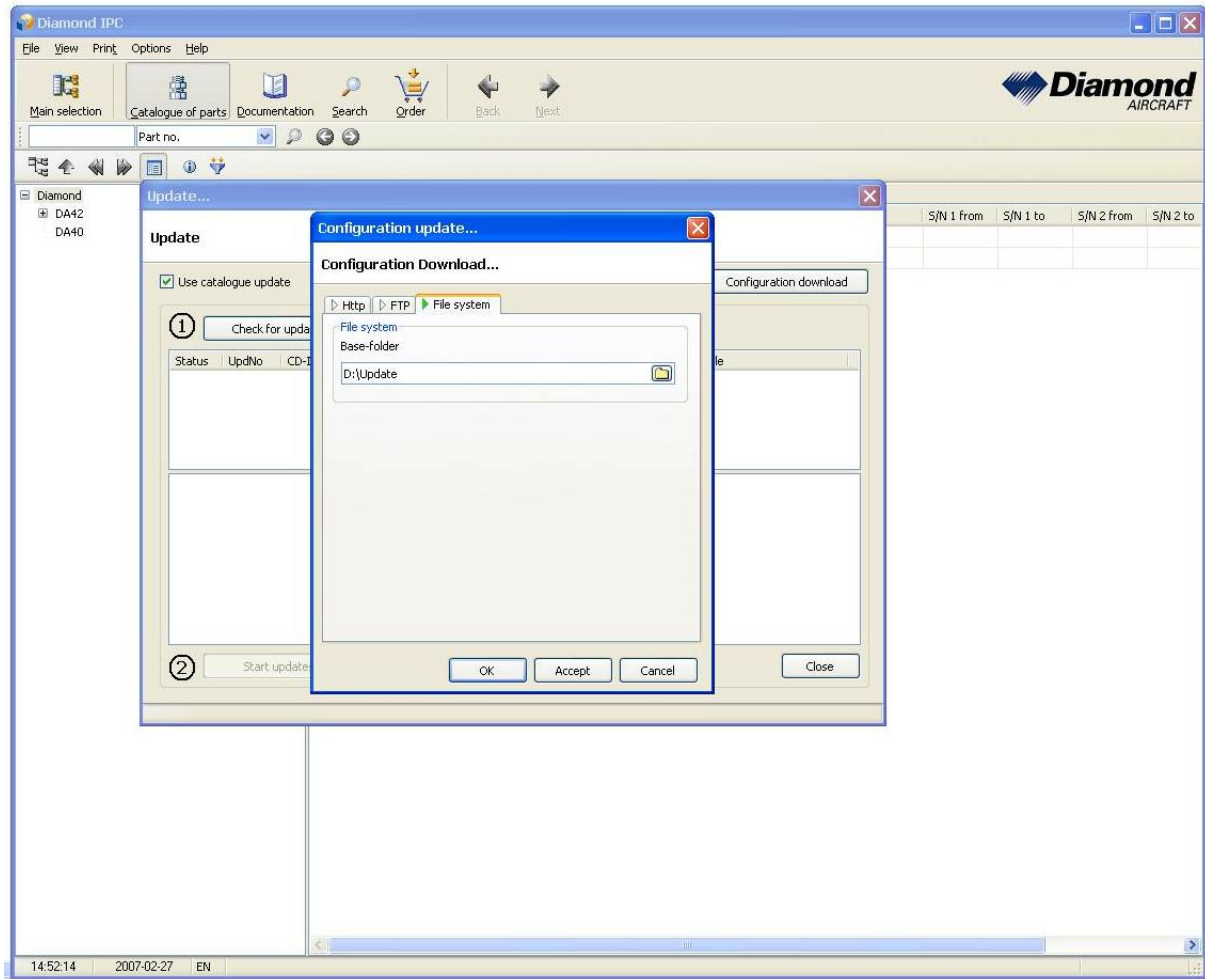

Step 3 (only required at the first update):
Click at button "Configuration download".

Step 4 (only required at the first update):

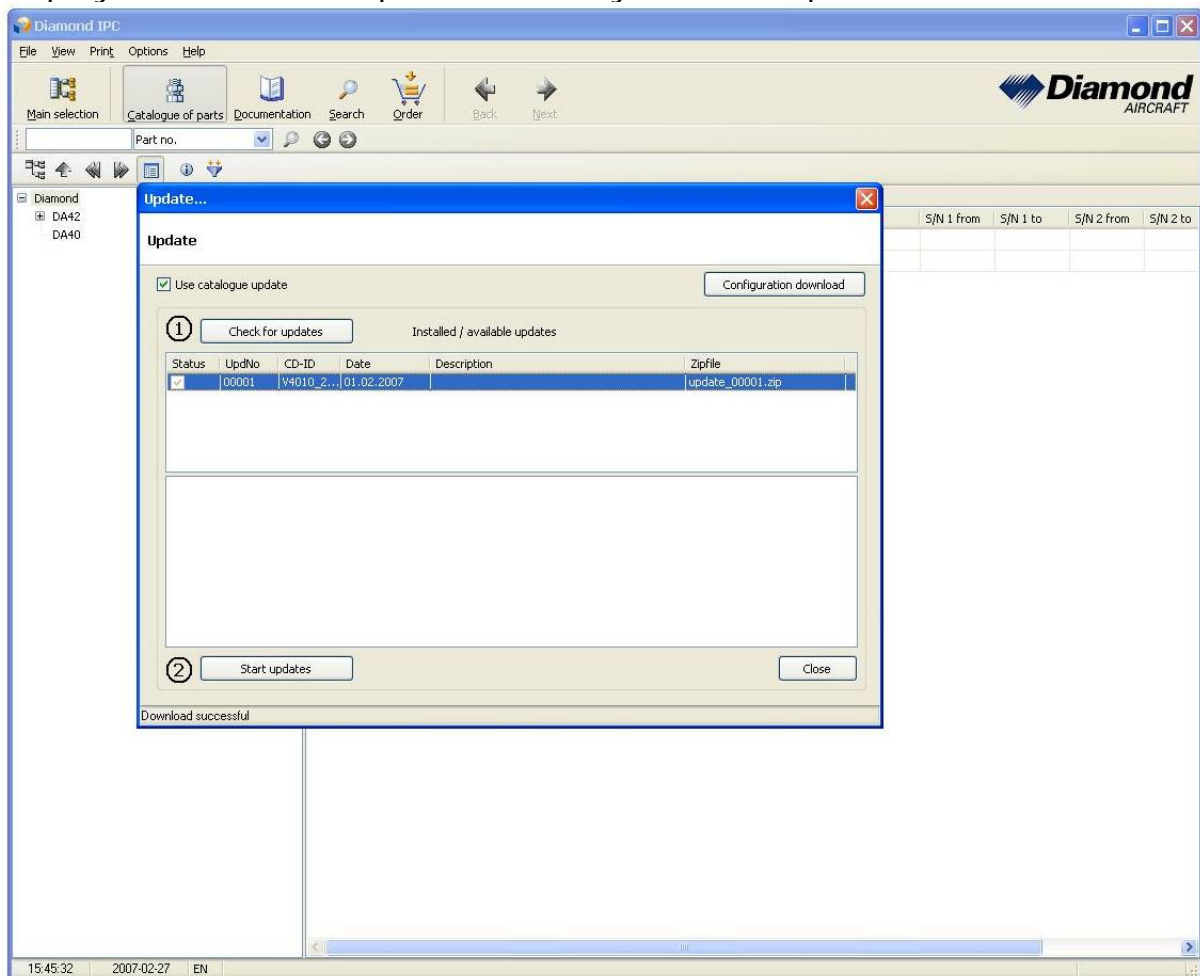

Chose "File system" at the configuration screen (instead of "Http") and click at "OK".

Step 5:

Click at button "Check for updates".

The update manager searches for updates at the local harddisc und displays the available updates. Already installed updates will be marked.

Step 6:

Select desired update.

Click at button "Start updates".

(Attention: Updates have to be installed sequentially)
